

Time Travel

(Full-Overview Summary)

Class: Time Travel – 101

‘The Time Particle in Space is the Neutron. Replication of the Neutron Particle is Time Moving Forward in Space.’ Subatomic Particles combine to Form Protons, Neutrons, and Electrons. As the Subatomic Pieces grow into a Piece, it is just a simple Quark Turning Up or Down to alter the larger Particle's Formed. ‘Protons Combine with Electrons to Form Neutrons, and Time has Moved Forward.’ In Quantum Physics we measure a Neutron by its Decay Rate. When a Neutron Decays into a Proton, that is known as the “Pre-Neutron.” When a Neutron Decays into an Electron, that is known as the “Post-Neutron.” ‘The 3-Phases of the Neutron coincide with the 3-Phases of Time.’

‘Neutron = This Moment in Time.’

‘Electron = Next Moment in Time.’

‘Proton = Past Moment in Time.’

‘The Neutron/Time Particle has a Time Location Memory for Where it Belongs in Space. It is caused by a “String Theory Attachment” to its Original Location in Space & Time. The Memory Location of the Neutron is a Memory of Where the Particle Became Modified from 1 state to another. The Transformational Location Memory Applies to Particle Locations in our Universe. Yet, there are 3 Dimensions of Space, and also 3 Dimensions of Time. Therefore, we have 6 Dimensions of Space & Time (6-D-S&T), that can be altered. By understanding how they are altered naturally in the Universe, we can modify them to perform a desired function, once we know the proper modification practices.’

‘When a Star is Born, its Atom's Neutrons are Formed into a Quantum Field Shell. The Star can live for Billions of Years before it dies. Yet, when the Star Dies, its Particles Remembering their Prior Location of Formation in the 6-D-S&T, will return to that spot via a Black Hole/Wormhole due to the 3 Dimensions of Time having been altered around them. The distance a Star Travels from its Original Formation to its End is Determined by the Advancement of Time, with Neutron Replication during the Period in Time that the Star was Active. The Star didn't ever actually move from its Original Location in Space where it Formed. The Star was Formed and Stayed in that Same Spatial Location. However, it is the Time Location that was Moving Space Forward. Doing so, the Star's Location was Frozen in a 3-Dimensional Spatial Location throughout the Forward Movement of Time. With the 6-D-S&T Moving Forward Equally, as the altered state of the Star's Memory Location is Moved

Farther Away from the Universe's Center within Time & Space. So, when the Star dies, it's Particles move from their Frozen Time State for the First Time since being Formed. Yet, the Particles are Returning to their Proper Time Location within Space & Time, from where they Began. The Particles Remembering their Magnetic Mass Position within the 6-D-S-T, move to Correct their Altered Location to their Proper Origin within Time & Space by position.'

'With each Repetition of Birth to End for a Star and its Solar System, the Particles of the Star and Solar System are Returning to their Proper 3-Dimensional Time Location within Space & Time. Yet, as their Proper 3-Dimensional Time Location has Moved Forward in Space Equally by the Growth of the Universe's Mass/Magnetic Field's Energy. The Time Origin Location for the Star being Formed, is Continually Moving further and Further Away from the Universe's Center through each Continuous New "Life Cycle" or 'Frozen Time Cycle. This is a result of the Total Mass of the Universe by the 6-D-S&T, continuing to grow at an Ever-Increasing Faster Rate of Speed.'

'The Particles of Stars, Planets, and Moons within their Solar Systems are not moving through Space. They are Stationary in Space, It is 3-Dimensional Space Growing that is moving the Particles further away from each other, and also further away from the Universe's Center. The only actual Unlocked or "Free Moving" Particles that can be said to be "Moving Through Space," are the Particles that are moving Between the Solar Systems and Galaxies.'

I know it can be difficult to understand, however, 'every Enclosure Formed by a Combined Number of Neutrons above 1, is a Formed Time Displacement Field. As such, each Time Displacement Field has an Altered Time for what we find on one side of the Time Field, from what is on the other side of that Formed Time Field.'

'A Time-Warp-Bubble/Atmospheric-Outer-Shell of a Planet, is altering the Time "Decay Rate" for the Particles within that Time Field. Although, the Displacement of Time is determined by the Time-Warp-Bubble/Time Field's Energy Strength. The Larger a Planet's Mass, the Stronger its Gravity/Magnetic Field. The Planet's Magnetic Field Strength is the determining factor for that Planet's produced Time Displacement Field Strength.'

'A Nucleus is Formed by more than one Neutron Combining. As that Permits a Time Displacement from one side of the Time Field from the other. Time is altered within the Atom as opposed to the Progression Speed of Time observed outside of the Atom.'

'A Biological Cell also having a Nucleus, has an observed Time Displacement between the Cells/Particles inside the Nucleus compared to the Cells/Particles outside of the Nucleus. However, the combination of Neutrons to Form a Nucleus Time Displacement Field for Atoms and Biological Cells, occurs at the Subatomic Level of Energy and Magnetic Attachments within Quarks. Whereas all Higher-Form-Type Time Displacement Fields that are Formed require Higher Energy to Bond/Fuse Neutrons under those Special Conditions.

A Quantum Field holds/Freezes a 3-Dimensional Time Moment by Location within the Spatial Movement of the 6-D-S&T. The Star's Solar System is Frozen in a 3-Dimensional Location/Moment of Time, along with the Particles inside of it; while the 3-Dimensional Spatial Location is moving around them. Unfortunately, when the Particles Time is Un-Frozen from the 3-Dimensional Time Moment in Space. The Particles new 3-Dimensional Spatial Location requires the Particles to move to correct their 3-Dimensional Spatial Off-Set from their known/Proper Beginning Magnetic Memory Location within the 6-D-S&T. The Particles must begin moving between the Fabric of Space & Time to correct their new, Non-Time-Altered-Particle-State. This is performed by the remaining Atomic Pieces after the Star Exploded and its Quantum Field/Time Displacement Field collapsed. The un-altered Particles new Location becomes "Bridged" via the Formed Wormhole to correct the Particles 3-Dimensional Magnetic Energy's Spatial Displacement Memory from their Proper Location within the 6-D-S&T.'

'Space is moving with Time, and that alters the Solar Systems Location within Time & Space. The only Locational Movement being performed by the actual Particles themselves, occurs Between the Fabric of Space & Time, as they move through the Wormhole; returning to their Original Proper Time Location within the Spatial Location of Space & Time.'

'The Neutron is the Time Particle and Time in the Universe. Time is the Mass of our Universe's Energy, and the Energy is determined by the Mass. The Universe Expands with Time. The Universe Grows as it Expands. The Universe's Mass Increases with Time.'

' $T=(E=MC^2)$ '

Learning Objectives:

1. Understanding what the 'Time Particle' is in Space.
2. Understanding of how we 'Measure the Time Particle in Space' within Quantum Mechanics.
3. Understanding of 'How the Time Particle is Modified to form Quantum Fields, Wormholes, and Time Warp Bubbles.'

Understanding for advanced classes covering:

1. Building and Designing Ships for use of "Faster Than Light Travel." (Mechanical Engineering).

2. Modification of Neutrons within Atoms of Minerals such as Metals, while they are formed and shaped into Aerospace Structures. 'Atomic Time Memory for Particle Formations of object designs.' (Advanced Mechanical Engineering).

3. 'Advance Time Travel Methods' (Physics)

4. 'Advanced Time Travel Methods and Applications for Ship Designs.' (Engineering)

Time Relativity:

Einstein published Special Relativity over 120 years ago. Einstein then later published General Relativity over 110 years ago. Relativity works for Cosmology to explain our Universe. Quantum Mechanics can also be used for Cosmology to explain our Universe. However, Relativity and Quantum Mechanics do not work together for Cosmology as the "math doesn't work" for a "Unified Fields Theory." There are pieces missing and we must correct that.

"Gravity" is a 'Magnetic Field's Attraction Force on Neutral Particles.' "Atoms achieve Neutral by having the same number of Electrons outside as they have Protons inside of them." 'However, Subatomic Particles are still attracted to Polar Opposite High Magnetic Fields. This Explains why Different Size, Shape, Weight, Mass objects achieve the same Max-Velocity/Terminal Velocity Speed. The Attraction of Gravity on an object is Increased by the Number of Protons being Pulled for Movement. More Dense, more Mass, and more Protons within an object's Atoms, Equals a Stronger Gravitational-Pull on the object compared to "Less Attracted" Neutral Atom objects.'

(There is no "Graviton" Particle to be found, as 'Gravity is not its own Force, but it is just another aspect of a Magnetic Field Force.')

Although, 'all Atoms when combined into a Mass have an associated Negative and Positive Polarity Attraction towards their Opposite Polarity Particles.' "Planets emit Electrons produced by their Spinning Core of metals." 'The High Energy Negative Polarity Magnetic Field produced is what causes the Gravitational Attractions we can observe in Space.' Electrons Flow from the Negative Pole Towards the Positive Pole keeping the Particles in Motion. 'Our Moon circles us in a Synchronous Orbit, as our Moon's Positive Pole with its higher attraction towards a Negative Magnetic Field is always facing our Planet. If the

Electrons being emitted by a Planet/Mass is equal to or greater than a Flow Rate of 2.0 Megajoules, Neutrons are Bonded/Fused Forming the Outer Shell of Atmosphere. The Barrier produced by Bonded Neutrons Forms a Time-Warp-Bubble around the Planet permitting Air Pressure to build within, as the 'Bonded Neutron Shell Separates the Atmosphere from the Vacuum of Space.'

This is how UFO Flight Technology works. 'By wrapping/electrifying an Object's Conductive Outer Surface with 2.0 Megajoules or more Electrons. The produced Negative Polarity Magnetic Field will Repel Earth's Gravity causing the object to Hover approximately 10-15 feet Above the Ground. (That is the Proper Power Level to Repel Earth's Gravity to Hover. As a Planet's Mass determines its Magnetic Field's Strength. The Power Level will vary depending on the Planet the craft is Repelling from, for Flight.) As the Power to the Outer-Surface of the object is Increased, the object will Gain Altitude until it Exits the Planet's Atmosphere. By Tilting the Craft's Magnetic Poles, the craft is able to Maneuver, just like Tilting a Helicopter's Rotor Head permits it to Maneuver. Inertia Dampening Technology is simply a byproduct of the Science used for Flight, as an object is not affected by G-Forces if it Repels G for Flight. (The G-Forces felt within the craft would be the same as those felt while we walk around the Earth, as the Earth Travels Through Space. This is due to the fact that the G-Force's felt within the Craft are that of the Magnetic Field Produced by the Craft.) Once in Space, the Time-Warp-Bubble surrounding the Craft can be modified into a Quantum-Field-Flight-Method for "Faster Than Light Travel," towards new Locations and Solar Systems in Space. (Travelling between the Fabric of Space & Time by way of a Time-Warp-Bubble/Quantum Field Flight Technology.)'

'Fusion is the Engine for the Technology.' However, Fusion is not as it is defined in books currently. Scientists learned about Fusion by studying Hydrogen Bomb Detonations Within our Atmosphere. Due to that fact, the Current standard Understanding of Fusion is highly Flawed.

According to current book definitions:

"Fusion is accomplished by extreme Gravity/Pressure and Heat."

However,

Gravity has already been redefined here for better understanding. As well, "Heat is known to be a Byproduct/Effect of Energy Conversion."

The current book definition continues with:

"Stars Burn Hydrogen until the Hydrogen is depleted and the Star's Gravity fails causing an explosion." That is truly impossible! We can't ignore basic Science in our explanations.

For anything to Burn you need:

1. Fuel.
2. Ignition of Fuel.
3. "Air," more specifically "Oxygen" for the "Fuel to Burn."

Where in the "Cold Vacuum of Space" is there air for anything such as a "Star to Burn" for approximately 1 billion years?.....

'Fusion is actually an Atomic Reaction.

A Mass of Atoms attracts Electrons towards itself. If the inward Flow Rate of Electrons is 2.0 Megajoules or more, a Quantum Field is Formed. The Particles move at the Quantum Field as such. Inbound Electrons perform a Quantum Leap Inward Bonding/Fusing the Neutrons to Form the Quantum Field Shell, and Protons Perform a Quantum Leap Outward Forming the Plasma. Stars Emit Protons. Stars are the only known "Inverted Atomic Structures" in Space. (Electrons Inside, 1-Nucleus / 1-Quantum Field Shell, and the Protons Attached Outside.) Due to a Star's 'Inverted Atomic Structure' and as it Emits Protons, Stars are the only known Positive Polarity Magnetic Fields in the Universe. A Star "Stays Active" by Drawing-in-Electrons that have been emitted by its surrounding Planets. If the Intake of Electrons stays at a Flow Rate of 2.0 Megajoules or more, the Quantum Field will stay Active, thus the Star Stays Active. If the Flow of Electrons keeping the Star Active is Interrupted, or if the Quantum Field is Breached, the Star's Quantum Field will Collapse. One Planet in a Solar System Produces enough Electrons to keep its Star Active, loss of Electrons would be an Immediate Quantum Field Collapse. However, after Billions of Years of a Star being Active and Collecting Electrons within it. The Star's Quantum Field will begin to Expand prior to it being Breached, just like a Balloon will Expand before Exploding with too much Air Forced Inside of it. The Star's Explosion is a release of an EMP as the Electrons Reverse the Quantum Field Leap Flow direction immediately and with great force.'

'When we are bending Space & Time, we need to know what specific application we are accomplishing. The Atomic Pieces we hit with our Flow of 2.0 Megajoules or more of Electrons, Determines the Type of Time Modification being Formed for our use.'

1. 'Neutrons with Protons & Electrons. ("Complete Atoms.")

Electrons attached to the Neutrons tell the "Inbound Flow of Electrons" where to Stop. The Electrons Perform a Quantum Leap to the Center of the Atoms, Bonding Neutrons to Form a Quantum Field Shell.' ("Star.")

2. 'Neutrons with Protons but No Electrons. (Post-Star Explosion.)

Electrons Form a Wormhole towards the Center of the Universe. This Reaction is the

Universe's way of trying to Equalize the Magnetic Field Forces Within it, just like "Jet-Streams" of Air move trying to Equalize Air Pressure Within an Atmosphere. Although both systems are unable to accomplish True-Equal, they are always moving as they continue attempting to achieve Equalization of the Particles and Fields within their Specific System.'

3. 'Neutrons with No Protons or Electrons attached. (Raw Neutrons in Empty Space.)
A Time-Warp-Bubble is Formed.'

** When we achieved Fusion Ignition for the 1st time in the world. The test was also a Successful Lab Test of the Quantum Field Flight Technology. (Lawrence Livermore National Laboratories was told to use 2.0 Megajoules to 'Bond/Fuse Neutrons' in July of 2022. I told the US Government via President Joe Biden May-June of 2022, but I was explaining the Science behind the Roswell Flight Technology. After the LLNL built the Transformer System to deliver the required 2.0 Megajoules, it was accomplished and proven in December of 2022. I have no doubt that those at LLNL's ethics will prevent them from falsifying documents to show Energy Testing Between the Levels of 1.0 – 2.0 Megajoules, prior to their successful test that was announced publicly. If you were the ones testing it in the Lab. Unless you had test information from each Power Level leading up-to 2.0 Megajoules. Is there any way without being told what it should do prior to? That you would point Lasers at each other, boost the Power to that of Powering ~1,300 homes during one second, then decide to "Pull the Trigger." Without expect it to kill you and everyone else? 70+ years, now you know why it wasn't accomplished before.) **

In 1951 the US Army Air Corps Performed a Successful Flight Test of Reverse-Engineered Roswell Technology. The Flight Test video was declassified due to age, per President Obamas release after 40+ years order. The Black & White Video showed 2 basketball sized, disc shaped objects, with huge wires attached, hovering approximately 10-15 feet off the ground, and above the heads of the Officers. The only information provided with the Video was to say, "It took a Power Plant of Energy to Accomplish." The average output of a 1951 Coal Power Plant was 2.25 Megajoules.

However, I did inform Mr. Biden that the Original Test Notes would have the Exact Power Used, and that Power Accomplished the Designated Tasks I had Listed.

Fusion was the Engine Powering the Craft. The Quantum Field Engine for the Quantum Field Flight Technology. The US Government has understood how to Repel Gravity for Flight since they accomplished the 1951 Flight Test. However, for the US Government to build a craft using the Flight Technology, they would have had to have it "Tethered" to a ground-based power station by a wire, without working Fusion Reactors.

**Last side note of Warning: Understanding their Technology, and with what few stories I have heard. I do not see how the Aliens could possibly have accidentally crashed. I truly believe they had to shut off their Fusion Engine in Flight to crash. I can only speculate why they wanted us to have their technology to learn from. However, we were tossing Solar

System Ending weapons at each other In-Atmosphere. Perhaps they wanted to teach us better. Nuclear Weapon Explosions are the Same Atomic Particles that are found after Star's Explode. Those Particles Form Black Holes when a Planet in Proximity is emitting 2.0 Megajoules or more of Electrons to initiate a Black Hole's Formation. 'We Need to Say No to Inner-Solar-System Nuclear Weapons Testing.' How can we tell a bomb, just take our Solar System down to the Subatomic Pieces of Atoms, and only move us "X" far Backwards in Space & Time. A Solar System is a System of Locked Time, if we Bridge to an Older Time Location, the Higher Magnetic Pull of Older Time will pull our Solar System towards the Older Time. One mistake, and a Solar System along with all of the Life Inside of it is Gone. The Particles will reform in the "Grand Scale of Life in the Universe," but All the Life that was there will be Lost. I do have to admit that there is still a slim chance that the Aliens engine simply failed, though it is not very likely. Not all Aliens will be friendly, and we will be prepared for such interactions. Yet, we do have some possible friends out there now. Again, 'No Nuclear Weapons should be Detonated Outside of Atmosphere, but Inside of our Solar System.' I have to warn you, the Aliens who I believe gave their life for that information, do deserve that much. I'm just saying. **

As we now better understand Stars. I do need to correct one last issue with the previous Gravity Explanation. It is currently written and explained by Scientists that. "Binary stars circle each other because they are gravitationally bound, orbiting a shared center of mass (barycenter)." 'There is nothing Special or Different about the "Barycenter" / Location of Space between two Binary Stars. Binary Stars Circle each other due to their having a Close to Equal Energy, Same Polarity, Positive Polarity Magnetic Fields that are Repelling each other. The observed dance of two Same Polarity Magnetic Fields Repelling themselves, is Exactly how the two Flight Tested Craft Danced around each other. (However, it was clear to me that 1 of the two crafts had the Positive Pole Inverted and Facing the Earth, while the other was Facing Up with more Rotating Mobility, but less of a Stationary Hold in a Hover. Thankfully, their having two possible ideas of how the Technology worked, caused them to build two models. Their having more than 1 Object for an "Initial Flight Test," is why I knew it was Reverse-Engineered; as well as it not being a New-Technology "One and Done" "Prototype" Flight Test.) Stars, will still Always only Attract Opposite Polarity Negative Polarity Magnetic Fields,' such as Planets and most every other "Heavenly Objects" found in Space.'

Conservation of Energy refers to "Closed Systems", such as Within an Atmosphere. However, the "Vacuum of Space" is an "Open System." 'Energy can be and is Created in the Open System of our Universe.' Stars emit Protons, Planets emit Electrons, on a Subatomic Level "Protons and Electrons Combine to Form Neutrons." 'Replication of Neutrons is Time Moving Forward in Space, it accounts for Dark Matter Energy in Space, it accounts for why the Mass of the Universe is Increasing, and it also accounts for why the Speed of Expansion is Increasing with Time.'

$$E=(MC^2)$$

Yet, the Universe Expands with Time. The Universe Grows as it Expands. Therefore, the
 'Universe's Mass Increases with Time.'

$$T=(E=MC^2)$$

'Time and Energy of the Universe are Equal in their measurement and in their Growth Rate.'
 'Time and Energy of the Universe Increase Equally together.'

Einstein published General Relativity over 110 years ago. Einstein did not have Telescopes as strong as ours back then. Einstein could only view one Consistent Expansion Speed at Every Location Viewed back then. So, Einstein could not Measure Time in Space. Yet, Einstein did Theorize that the Speed of Universe's Expansion was either Increasing or Decreasing. We do not have that problem anymore. With the Hubble Telescope we could see Far Enough Away to Recognize a Difference in Expansion Speeds by the Locations Being Viewed. At first glance it appears that the Universe's Expansion Speed is both Speeding-Up and Slowing-Down.

Time/Speed/Distance:

'Distance is set, a Telescope can only see so far.'

'If Speed has Changed then Time has Changed at that specific Location.'

'By Measuring the Slowest Expansion Speed, we have Located the Direction Towards the Center of our Universe.'

Quantum Mechanics needed to know what the Time Particle is. 'The Neutron is the Time Particle due to it being the Particle we modify to bend Space & Time. Furthermore, we already knew how to measure the Decay Rate of Neutrons. (Neutron = This Moment of Time, Electron = Next Moment of Time, Proton = Previous Moment of Time.) When we have decided what True-Time is, we can look at a Location in Space, and by its Expansion Speed we can Determine the Universe's Mass at the Time for that Location of Space outward from the Center.'

Time Travel

Technology Explained:

'The first step to building a working Time Machine is the understanding of how to Form the 3 different types of Time Fields. Each type of Time Field is used to perform a specific task as we Travel Through Space & Time From one Location to Another.'

When we view different locations in Space. There is an associated Distance from our Location in Space to the Location we are Viewing in Space. For example, if we are looking at a Star that is 400 million Light Years Away. We know that the Light we are viewing took 400 million years to travel the distance from that Location to ours. As such, should we travel to that Location at the Speed of Light, it will take us 400 million years to reach the new destination. That is the distance that needs to be Traveled to Reach that Specific Location from our own Location in Space & Time.

The 6-Dimensions of Space & Time can be broken down into 3-Dimensions of Space (Spatial Locations), and 3-Dimensions of Time (Time Locations in Space). 'When we travel through Space, we have the ability to Travel Between Locations by Altering any of the 6-Dimensions of Time & Space.'

Most Current Travel Methods only focus on Altering Spatial Locations as a way to Travel from one location to the other. However, 'due to the Distances Between Solar Systems in Space, Time Modification Travel is a far better way to Cross such Vast Distances.'

Whereas, 'Spatial Travel is a Propulsion "Sub-Light" / Less Than Light-Speed, Form of Travel used between Closer Locations, such as between two Locations Within the Same Solar System. Performing Travel by Altering the Time and therefore the Spatial Distance between Locations is a far faster, and better way to Break the Distance Between two Locations in Space that we wish to Travel Between.'

** When I reference Linear Time. I am referring to Earth Time. This is as Every Planet in a Solar System has a Different Linear Time speed that is a 'Base-Offset of Day/Date/Time' from what we know on Earth. The Planet's Mass, Location in a Solar System, Rotational Speed, and Orbit Speed around its Sun is Different from those Exact Parameters found on Earth. Quite frankly, even a Satellite in Earth's Orbit has a slight Base-Offset of Time from if it was on the Surface of Earth. Such Base-Offset Corrections are Programmed into GPS Satellites, permitting them to keep Perfect Time With us on the Earth, as we use that Satellite to Assist us in our Navigation Around the Surface of the Planet. So, when I speak of Linear Time within this document and others, I am using 'Earth's Linear Time as the Standard Expression of Linear Time Progression.' That Day/Date/Time may not mean anything at the exact Planet and Location we are talking about traveling to. Yet, being from Earth, it is easy for us to transfer our Perspective of Linear Time onto a New Locations we view in Space. Today on Earth, is Today on Mars from what most understand, just like tomorrow and yesterday is easily accepted by the normal/standard understanding of "Time" no matter what 'Planet's Actual Time' we are talking about. **

1. Quantum Field Travel: Is 'an "Instant-Jump" from One Location in Space to Another

Location in Space.’ As such, there is ‘no Obvious Progression of Linear Time Variations from the Start Location to the Target Location as Travelled.’

Nothing in Physics is Truly “Instant.” If something moves faster than we can see, or the change occurs at a Quantum Level preventing us from seeing the changes occur, we refer to such changes as “Instant.” ‘There will be an Actual Time Associated with Travel for the craft that is Performing Quantum Field Travel between two Locations in Space. The Time Associated with the Quantum Field Jump/Travel from one Solar System to another will need to be tested for us to know the Exact Distance/Time Variation for the Specific Type of Travel being performed.’ For example, we may recognize that there is a 1 micro-second per 1 million Light Year’s Forward Movement of Linear Time as we perform our travel to the new Location. We could leave Earth on October 5th, 2026, at 5:00:00 pm, and arrive in our new Solar System Location by ‘Earth Time’ October 5th at 5:00:03 pm. That is “Faster Than Light,” “Instant Travel,” but not exactly “Instant Travel” by Proper Definition.

2. Wormhole / “Rosen Bridge” Travel: ‘Permits us to move Particles / Objects for Backward for Linear Time Jump/Travel. The amount of Backwards Linear Time that we can Travel Depends on the Distance for the Location we wish to perform a Backwards Linear Time Jump towards. If we are viewing a Star that is 400 million Light Years away, and we use a Wormhole to Bridge the Entire Distance to be Traveled. We will Travel Backwards the entire distance. Therefore, a Star 400 million Light Years Away, permits us to Travel Backwards in Linear Time up to 400 million Years, to that Location we are Traveling to.’

Scientists believe that we cannot travel back to a Time before a Time Machine was built, that’s not entirely true. ‘It doesn’t specifically matter what date the Time Machine was built here. It only truly matters when the Time Machine was built here, in relationship to the distance we are travelling, to get to another Location in Space & Time.’

‘Time-Jumps Should Not be Performed Inside of a Solar System.’ Until the Safety has been Confirmed with Proper Testing. The Risks to any Solar System due to a Wormhole becoming Errant/unstable and “Out-of-Control”, are far too great during initial testing. However, as we begin to perform Time Jumps between two Solar System Locations in Space. ‘It is still my belief that it will be Easier, and Much Safer for all Life Within any Solar System, if we Only Perform Time Jumps as we are Traveling Between Solar Systems, rather than performing Time Jumps within a Solar System.’

Here is why:

‘A Solar System is Formed by the Star at its Center. A Star is Formed by a Quantum Field that Freezes Spatial Movement/Expansion Within the Confines of the Solar System. However, “Time” still Moves Forward at Normal Location Speed for the Specific Solar System.’

Yet, within an Atmosphere the Time Degradation Rate of Particles is Slowed by Air Pressure,

Moisture, and Heat permitting the Particles to Continue Living/growing Within the Atmosphere.

I must break down the Explanation of Time & Space by how, 'Each Field Modifies 1 or more Permissible Movements within the 6-Dimensions of Time & Space.'

6-Dimensions of Time & Space = 3-Dimensions of Time ('3-D-T') + 3-Dimensions of Space ('3-D-S').

- 'Inside of an Atmosphere for a Planet, all 6-Dimensions are "Frozen" in relationship to Space, '3-D-T is Frozen & 3-D-S is Frozen.'

- 'Inside of a Solar System, 3-D-S is Frozen in relationship to Space, but 3-D-T is permitted to move.'

- 'Outside of a Solar System, all 6-D-S&T are permitted to move freely. As such, we have access and are free to modify any of the 6-D-S&T.'

'We must be between Solar Systems, for us to perform 3-Dimensional Time Movements and 3-Dimensional Spatial Movements within the 6-Dimensions of Space & Time. As all 6-Dimensions are accessible only when the 3-D-T + 3-D-S are permitted to move freely. Although, there are differences between each specific barrier by its location, it is just so much easier to refer to each barrier as a "Time-Barrier" within Space & Time as a General Term for discussion and explanations. Just know that each specific barrier when it is being discussed in relationship to another will have one or more Time & Space Variations to be considered by the specific comparison.'

Scientist just recently discovered the "Outer-Time-Barrier" of our Solar System. Although, they do not yet fully understand what they discovered. There is an "Outer Heat Barrier produced by our Sun." 'However, for us to measure a variation of Heat in Space. We need Heat to be Absorbed by a Surface, for it to then be Radiated by the Surface allowing us to Measure an Increase of Heat. The Surface of the Earth gets hot when it Absorbs the Radiation from our Sun. Radiant Heat Energy released by the Surface of the Earth Declines an average of 1 Deg. C. per 1,000 feet of Elevation Within an Atmosphere. Until we get close enough to measure Heat Radiating Directly from the Sun, we do not Measure Heat in Space, if it is not Absorbed by something permitting it to be Radiated back to us and our measuring equipment. So, the "Barrier of Heat" at the edge of our Solar System is a Barrier that can Absorb Radiation. That Surface is the Outer-Time-Field of our Solar System, but it acts like an Outer-Spatial-Field for our Frozen Spatial Location of our Solar System within the forward 6-D movement of Space & Time. Each Formed Barrier Separates one or more Time/Spatial Movement from one side of the Field and the other. We as a Particle can move inside of our Solar System. However, there is no Spatial Expansion between Planets. There is Spatial Expansion of the Universe Outside of our Solar System's Final Time Barrier.'

There are also '3 Types of Time' that need to be understood:

- 'Linear Time: Is a Forward Linear Movement, or "Life Cycle" of a Particle or group of Particles, Forming Biological or Non-Biological bodies of Mass. There are many Concepts of Linear Time such as Seconds, Minutes, Hours, Days, Weeks, Months, Seasons, Years, etc. However, all Concepts of Linear Time are only Applicable in Relationship to a Specific Location such as with Earth Time.'

- 'Particle Time: Is a Total Linear Progression of Time for a group of Particles, such as a Solar System from beginning to end. A Solar System is Formed in a Star Hatchery. The Solar System will move Outward Through Space & Time from the Center of our Universe until it dies. When the Solar System's Star dies, the Particles Travel through a Wormhole back to their Birth Location in Space & Time. The Debris Field for the Particles as they Re-Enter Space & Time, from being within the Fabric of Space & Time, should look exactly like a Star Hatchery. Then the Particle Time for those Specific Particles begins again.'

- 'Universe Time: Is the Sum Linear Progression of Time for the Universe and all Particles within it, since its birth to now, no now, no now, no now, so on, Indefinitely. Without any Explanation in Physics to suggest otherwise.'

Not to get too in-depth for the 'Solar System's Outer-Time-Field-Barrier.' Yet, in essence although the size is tremendous in comparison. 'We can express the Outer-Time-Field-Barrier as being the Nucleus of our Solar System's Atomic Structure of Particles. As if the Outer Time Field is Required to Correct our Star's Inversion of Atomic Structure. Protons are now one Mass, Neutrons are Planets with Time Warp Bubble / Atmosphere, Additional Particles of Mass are Quarks that have yet to be combined into Particles within the Atom's Structure.'

'By that new explanation, it is easier for Scientists to understand why Solar Systems seem to Function as "Closed Systems," (or Partially Closed Systems as 3-D-S is Contained, but 3-D-T is Not Contained Within the Solar System.) Yet, Space being the Universe as a whole, most certainly operates as an "Open System," (or Full Open System of 6-D-S&T, with all Time and Spatial Movement, 3-D-T + 3-D-S Movements Permitted.) To slightly Alter current Conservation of Energy Standards. However, with my Additions to "Relativity" that I call Time Relativity, and with my Additions to Quantum Physics Understanding of the Time Particle. There is no need for a "New Unified Fields Theory" to Explain the Universe. Relativity with its 2nd-Update/3rd Explanation for Further Understanding. Time Relativity and Quantum Physics with the Addition of Time to it as well. Work Together Flawlessly from my Perspective, even by the Math to Explains How the Universe Works Properly already.'

3. Time Warp Bubbles: 'Being the most Abundant and natural occurring Formation Type of Time Fields found in Space. Are also the Easiest Time Field to Form by use of Technology.'

- 'A Time Warp Bubble may be Formed simply by Bombarding Raw Neutrons with the Proper

Level of Electrons, by Flow Rate. Such as Electrons being Emitted Outwardly by an object that has its Outer Surface Electrified to the Proper Power Level.'

- 'A Time Warp Bubble may also be Formed by Energy Released by an object due to Propulsion/Velocity Through Space & Time, as Expressed by Einstein's Definition of "Time Travel." By way of Propulsion to Achieve Faster Than Light Travel Forming a Time Warp Bubble; as Opposed to, Forming a Time Warp Bubble Prior-to-Propulsion such as with Quantum Field Travel' / "Instant Non-Time Travel," as some have insist at times.

'The Combination of Time Travel Physics being Applied to Technology is actually a rather Simple Obstacle to overcome. However, if we want to Time Travel to a Specific Day/Time/Date, being Less than that of the Total Day/Time/Date-Offset Permitted by the Distance of travel Between two Locations in Space & Time, is much more Difficult. For us to Arrive at a Specific Day/Time/Date at a Location other than the Total Permitted Forward or Backward Linear Movement by the Distance Between the two Objects. We must use a Combination of Quantum Field Instant Travel, with Wormhole or Time Warp Bubble Travel as we move Towards our Desired Destination in Space & Time. We will be Required to Perform ample amounts of Testing, for us to Perfect our Understanding of the Exact Time Duration for a Time Field used, as we attempt to Perform Time Jumps to Exact Day/Time/Date Forward or Backwards in Linear Time. We will not be able to Fully Automate Time-Jumps by Inputting an Exact Day/Time/Date into our Navigational Equipment to Perform a Perfect-Time-Jump, until we have enough Data from the Testing Performed.'

'Although a Time Jump should be Performed as we Travel Between two Locations in Space & Time. The Time Jump's Offset will continue to be Applied to any Other Locations we Later Travel to as a Spatial Location Movement, even using Quantum Field Instant Travel to Locations. Until we Perform an Equal but Opposite Time Jump Back to our Proper Time Location within the 6-D of Space & Time. If we Time Jump Backwards 100 Years during our travel to a planet called "Alpha Centaury" for example. Should we then Perform a Quantum Field, Instant Jump Traveling Back to Earth, we will see Earth 100 Years Ago. As Time Has Not Been Corrected in our Return Trip from the 6-D Time & Space Location we would have left Alpha Centaury for the Second Half of our Travel/Trip Back to Earth. The only way to Return to our Proper Location within the 6-D of Space & Time, is by Correcting/Counteracting any Previous Time Jumps Performed since the "Proper Now Moment" we left Earth's Location from, within the 6-D of Space & Time.'

Teleportation / Transporter Time Travel:

The 6-Dimensions of Space & Time are Comprised of the 3-Dimensions of Space, and the 3-Dimensions of Time.

The 3-Dimensions of Movements within a Spatial Area / Space are:

1. Up & Down.
2. Forward & Back.
3. Left & Right.

The 3-Dimensions of Time are:

1. The 4th Dimension of Space & Time, This Moment of Time.
2. The 5th Dimension of Space & Time, Next Moment of Time.
3. The 6th Dimension of Space & Time, Previous Moment of Time.

The 3-Dimensions Of Time Movements are:

1. 'Linear Time Movement Forward & Back.
Forward Movement is a set speed / Decay Rate for the Particles, but we may perform Time Jump Forward or Back along a Linear Time.'
2. 'Up and Down from our Solar System's Time-Line to another Solar Systems Time-Line.
Quantum Field Travel between Solar Systems in Space. As every Solar System is Traveling along its own Time-Line away from the Center of our Universe. If we move to a Solar System with a Higher Energy Rating than ours, we have Moved Up to a Higher Energy Time-Line. If we move to a Solar System with a Lower Energy Rating than ours, we have Moved Down to a Lower Energy Time-Line'
3. 'Sideways Movement on a Time-Line.
Although it is certainly possible to perform a Sideways Time-Line Movement with Quantum Field Travel. By moving to a Solar System with an Equal Energy Rating as our own Solar System. Such a Sidways Quantum Field Travel Move must be made in the "Sweet Spot" Onion Layered Time Ring that our Solar System was Originally Formed in, for the Solar System to be Equal with our Solar System's Time-Line Energy.
Yet, if we are using Quantum Field Travel between two locations in the Same Solar System, then we can say, we are performing a Sideways Time Jump on the same Time-Line.
However, usually when we Reference a Sideways Time Movement, we will be Referencing Teleportation. As Teleportation is a Sidways Movement of Select Particles from one Spatial Location along a Time-Line, to another Spatial Location on the same Time-Line within the Same Solar System.'

Further Study is Required before we can build a prototype of the Teleportation / Transporter Technology to be tested for use at this time.

As for my current outlook for our advancement of Teleportation / Transporter Technology. I hope to look further into 'Magnetic Atomic Bonds between individual Atoms for a Memory Formation of Molded/Formed Materials such as Metals. It is my hope that with what I learn will be able to transfer over into an better understanding of how to get Atoms to return to a desired or pre-altered Formation for Biological and Non-Biological bodies of Mass. Furthermore, as I begin working on Teleportation, I expect to focus on Teleportation of Non-Biological bodies of Mass long before I will feel confident testing a transport of a plant, let alone a living animal such as a human. Yet, I do not see a reason why we should not be able to "break the code" on Teleportation Technology very soon also.....
